

# Are you ready to go fishing in style?

## Factory Zero Stainless Steel PWC Fishing Rack

The Factory Zero PWC Fishing Rack is made from high grade polished stainless steel material for strength, durability and to Factory Zero's high quality standards. These units have been developed and tested to allow the best and safest fishing experience available aboard a PWC.

Installation and removal is fast and easy and **requires no drilling**. The front of the fishing rack mounts securely to the rear tow hook OEM holes by simply following the instructions and utilizing the supplied hardware. The rear of the fishing rack utilizes the Factory Zero ratchet strap system to attach the rear OEM tie down hooks.

The rack is designed with drain holes to allow any water that might get in the fishing rack to drain.

These units are made to fit each specific PWC model and shown to the right.

Included in the kit is one adjustable/positionable fishing rod holder and a soft sided cooler bag.

*\*Please read all of the instructions completely before installing the unit. Factory Zero had developed each unit for the use with the specified watercraft, do not use the fishing rack for any other use. Factory Zero recommends when fishing that each PWC be equipped with a GPS and a communication device in case of an emergency.*

*When fishing make sure to check all weather and water conditions before launching. Before each trip please check all mounting and straps to verify the fishing rack is tight and not damaged.*

*\*\*The image to the right features special order options available from Factory Zero. The upgrade features shown are not included with the base fishing rack*
